Feedback

What did you like?

food ;)

friendly and open community, LOTS of packed knowledge

the hands-on approach and the friendly atmosphere

more participants than last year well prepared talks discussions no time pressure
(rushing from talk to talk)

What would you improve?

some lecturers need to improve their presentation skills: keep the presentations in shorter, more digestible pieces, then answer more questions; rehearse and make the presentation smoother more interactive parts

larger or more breaks for discussions and relaxing

all speakers should attend the whole workshop and not just come and go like a "helicopter"

Anything else to tell the organizers?

thanks to all organisers
